

SHAW ELECTRIC, INC.

BETTENDORF CHRISTIAN CHURCH ADDITION

BETTENDORF, IA

Commercial: Electrical | (\$250,000 - \$1 Million)

Size of Project:
28,060 sq ft

Length of Project:
10 Months

TYPE OF CONSTRUCTION

As the Bettendorf community continues to grow, so do the existing buildings. The Bettendorf Christian Church decided to expand their facilities to accommodate their growing congregation and the team at Shaw Electric was brought on to help them renovate their facility so it's designed for the 21st Century.

BUILDING FEATURES

The church project included 1200-amp new main service, 75KVA isolation transformer, GE panels and 225KV transformer, feed to existing MDP from the new MDP to power existing church from new addition. Additionally, the Shaw team added new LED lighting and control, Nlight air control, DMX lighting, four inverters for emergency backup, 2VFDs, receptacles, HVA and baptismal tank, underground conduits for AV, new FACP and annunciator, replacement of existing fire alarms in church and Cat 6 data cabling and terminations.
